

Membership Application and Renewal

Supporting Industrial Technology Education for over 80 years

CITEA members have renewed their memberships this past year and CITEA has also added many new members. Thank you all very much for your support of CITEA.

Our organization continues to work diligently to provide services to Industrial Technology professionals throughout the state. By providing CITEA Conferences in both Northern and Southern California we are reaching out to offer technical training and hands-on workshops that demonstrate current lessons and curriculum incorporated into a variety of shop programs. We had a large turnout in Petaluma this past September and also at our new conference at the Los Angeles Trade and Technical Center in December.

CITEA is active in the political arena as well. Our efforts helped Assembly Bill 1330 passed into law - a major victory for CTE Education in California. This law goes into effect next school year allowing CTE courses to meet the high school graduation requirement. Students now have a choice to take a CTE course along side Visual/Performing Arts or a Foreign Language.

CITEA is very productive each year hosting our big Annual Conference in March. Our 2012 conference will be held at the Long Beach Convention Center.

With all these positives working for you it is important to keep your membership current and our work going. We are making gains in service and on the political stage for our membership. Help us meet the goals of CITEA - your professional organization. Renew or start your professional membership to stay informed and updated on issues that concern you and your profession. Membership is a driving force for this organization. Please renew or join if you have not already done so this year.

Membership Fees are valid for one year from September to September. Members that sign up before December 31st will receive a discounted registration fee at the Annual CITEA Conference. Joining is easy. Go to the CITEA website, fill out the membership application form and send it to me via email or regular mail.

Dual Membership – CITEA and ITEEA (International Technology and Engineering Educators Association) - \$90.00
Professional Membership - \$65.00
