MTTA / CDTC 2009 SUMMER CONFERENCE

Monday, July 13 – Wednesday, July 15
CAL POLY SLO, SAN LUIS OBISPO, CALIFORNIA
Host: Martin Koch

See the labs and classrooms in the state of the art teaching facility of Cal Poly SLO! The conference will be “co-hosted” by both the CDTC and MTTA.

There will be **hands on activities** for all attendees in the **state of the art foundry** and pattern making labs. The **machine shop** will be open for training and live project work. **Rapid prototyping processes** will be presented by department instructors. **Drafting** software with updated materials will be presented along with integrated manufacturing activities.

Martin Koch has pulled together elements from industry to make this conference a great end of summer activity just before school starts!

This conference will feature activities designed **to help teachers of manufacturing and drafting classes survive** and grow strong in a very competitive educational climate.

Sunday, July 12 at 5:00pm the conference kicks off with pizza party at Woodstocks Pizza, 1000 Higuera Street in San Luis Obispo. Activities on Monday, July 13 through Wednesday, July 15 will be centered around the technology facility at Cal Poly. Be there to see the labs and some of the best machining centers and drafting labs available in the educational field and industry today.

TECHNICAL TRAINING

Small group (5-7) “hands on” training will be a focal point of the conference this summer. Conference participants will be making and ramming up molds, pouring castings, and learning to use the latest design software. There also will be basic and advanced sessions on manual machining and CNC work on the Haas machining centers. Our vendors will be hosting Solidworks, Sketch-up, and Mastercam hands-on project based workshops. Laser cutting, 3D printing design and Chief Architect workshops will also be held.

THE GREAT MTTA BARBEQUE

You are invited to experience “industrial eating” at the *GREAT MTTA BARBEQUE*. Always more than you can eat and better food than anywhere else, special flavor that only a manufacturing teacher could put together! David and Julia Summers again will host the barbeque.

Hotel and motel rooms in San Luis Obispo will be in short supply due to the many activities in the area during August. To be sure of a room close to the college, make your reservations as soon as possible!

If you need more information about the MTTA / CDTC 2009 Summer Conference contact Steve Heck at sheck@nocrop.us or 714 713 7401 or Arnie Ruskin at Ruskin@att.net.
