

YOUR Professional Teacher's Organization needs your Membership

Supporting Industrial Technology Education for over 80 years

CITEA is currently in the process of recruiting members and strengthening our organization. Increasing our membership is essential with all the challenges facing Industrial Technology Education in California. As educators, we are dealing with many issues that affect what we teach and how we teach it. CITEA works extremely hard to support teachers and find solutions to help ITE survive in our educational system.

Due to the crisis in California's ITE Education System and the need for political engagement to address the issues, CITEA separated into two organizations in the late 1990s. CITEA became the political arm of the organization and incorporated as a politically active nonprofit organization. The CITEA Foundation was formed at the same time, to carry on the educational, professional development, and social functions of the organization.

We face many obstacles in Sacramento. Please go to <http://citea.org>. Read the newsletter article on CTA's A-G agenda and how it is affecting ITE. By increasing our membership numbers we can strengthen our political power. By sending letters and emails that support legislation directed toward reviving ITE in our schools we can help make its survival a reality.

The CITEA represents Industrial and Technology Educators and Programs, including ITE and Vocational programs in the K-12 system, community colleges, and universities. We are looking to these professional educators to support the efforts of the CITEA legislative team in Sacramento. They are battling for ITE and us. **PLEASE GIVE YOUR SUPPORT!!!!**

Membership Fees are valid for one year from March of our Annual CITEA Conference to the following March. Members that sign up before December 31<sup>st</sup> will receive a discounted registration fee at the Annual CITEA Conference.

Professional Membership Fee	\$65.00
